PCs And Internet Requirements

Most reasonably modern PCs meet the requirements to run Password tests:

- Microsoft Windows 8 or 10, or macOS 10.15 Catalina or above, operating system
- Stable Internet connection with a minimum bandwidth of 200kbps
- On a Windows PC Chrome (version 53 or above) or Firefox (version 42 or above) or Edge (version 79 or above) web browser, or on a Mac Chrome (version 74 or above)
- Headphones or speakers
- A microphone

Preparation

Before taking a Password test you must check a few things:

- The test must be run on a Windows PC or laptop using Chrome, Firefox or Edge, or on a Mac using Chrome (not Safari), it will not work properly on an iPad, tablet or mobile phone
- Check the Internet connection, a stable Internet connection with a minimum bandwidth of 200kbps is needed to run the test successfully
- To check the Internet bandwidth, please use this link to fast.com, this only takes one click and a few seconds, and must be done in advance of running the test
- Check that the microphone and headphones/ speakers are connected, working properly and the volume is set at a comfortable level
- Close all browsers, programmes and other software
- Start Chrome, Firefox or Edge and navigate to the Password login page passwordplatform.englishlanguagetesting.co.uk
- Enter the following login and password codes
Login: **checksetup4** Password: **setup**
- Click on "start" and then "continue", enter your name, click on "continue" and follow the instructions on the screen
- If the browser asks for access to the microphone click "allow"
- When you have completed the set up test, the login page will be displayed again and you now must check the sound file recorded, login again using:
Login: **resultscheck** Password: **check**
- Click on "login" to display the "Results & Certificates" page
- Click on "SEARCH" and you will see your name displayed near the top of the results listed, click on the  icon next to this result under "View Record"
- Click on "VIEW", and "VIEW" again in the pop up displayed
- Click on the audio player arrow to hear the sound you recorded in the set up test
- If you can hear the sound you recorded clearly the microphone is working

Taking The Password Test

No other PCs, laptops or phones in your home can be using the Internet whilst you are taking the test as this will take bandwidth which you will need for your test.

Take the test in a quiet place where you will not be disturbed.

To take a Password test:

- Close all browsers, programmes and other software running on the PC
- Start Chrome, Firefox or Edge and navigate to the Password login page passwordplatform.englishlanguagetesting.co.uk
- Set the browser window to fill the entire screen; on a Windows PC press the F11 function key, on a Mac click on the "View" tab and ensure that "Always Show Toolbar in Full Screen" is not ticked then click on the green button
- Enter the login and password you have been sent and click on "login"
- If the browser asks for access to the microphone click "allow"
- Check that your headphones/ speakers are working when asked to do so in the test
- Check that your microphone is working when asked to do so in the test
- Make sure you click "finish" to save all your answers and complete the test
- On a Windows PC press the F11 function key to return the browser to its usual appearance, on a Mac click on the "View" tab and tick "Always Show Toolbar in Full Screen"

Password Test Results Report

Your results report will be sent to the email address you supplied within five working days.

Difficulties When Running Password Tests

The commonest difficulties are caused by:

- Leaving insufficient time to set up and test PCs in advance of (trying to) run Password test(s)
- Failing to follow the instructions in this document
- Failing to contact the Password Team for help if this is needed
- Using an unsupported operating system; Windows 8 or 10, or macOS 10.15 Catalina or above, is needed
- Using an unsupported browser; Chrome, Firefox or Edge is needed
- Having an intermittent Internet connection or insufficient bandwidth
- Not closing all browsers, programmes and software running on the PC before starting the test
- Having other programs running that generate "pop ups" or messages while the test is being taken
- Use of operating system software that is not up to date, usually because "automatic updates" is not working
- Using a PC that has some form of "virus" infection, in particular those causing the browser to redirect
- Failing to check the headphones/ speakers and/ or microphone
